

Jahnavi Mange

*Regenerative Design Strategist & Storyteller,
Co-Founder*

From Soil To Soul

Jahnavi is a transformational leader driven by a deep commitment to fostering leadership and compassion in climate solutions and social innovation. She holds a Master's degree in Design for Sustainability and Industrial Design from the Savannah College of Art & Design, Savannah along with a Bachelor's in Electronics Engineering from Mumbai, India. Jahnavi is also a certified Permaculture Designer from Santacruz Permaculture Farm and a Strategic Foresight Practitioner from The Future School (TFSX).

Currently, Jahnavi is in the process of launching her startup, From Soil to Soul, a deeply personal venture focused on regenerating and restoring our relationship with the land, promoting collective healing, and advocating for food justice and equity. She employs storytelling, systems thinking, youth empowerment, and community-building to create meaningful impact.

Jahnavi brings a wealth of experience in sustainability & regenerative design strategy, having worked at the grassroots level with the City of Savannah to develop frameworks for social innovation, the SDGs, clean energy, and equity. At Dhana Inc., she led efforts to promote behavior change towards conscious clothing consumption through the medium of circular economy. She has also consulted with major corporations like Coca-Cola, Volvo, and Heineken, embedding sustainability into their business strategies.

With a spiritual and poetic approach to life, Jahnavi's ethos is reflected in her work and in the vibrant communities she builds. Beyond her professional roles, she dedicates herself to climate leadership by mentoring students to embrace regenerative thinking, volunteering for forest restoration projects, and supporting organizations focused on social and climate justice.
