ME120-Experimental Methods – FALL 2021

Instructor: Ananda Mysore

Office Location: E133

Telephone: 408.306.4537

Email: Ananda.mysore@sjsu.edu

Office Hours: Monday 4:30PM to 5:30PM by appointment online

CLASSROOM: ONLINE(Lecture) & E133(Lab)

Prerequisites: CE 112 & ENGR 100W with C- or better grades

Corequisites: ME130. AE Majors use AE162 & AE168 to satisfy corequisite requirements.

Misc: Lecture 1 hour/lab 3 hours

Class Days/Time:

* Lab sections are subject to change, based on enrollment

Course Description

Theory and practice of experimental methods and sensors for mechanical measurements; statistical and uncertainty analysis; computer-hosted data acquisition, processing and analysis; formal report writing and presentations

Course Format

Technology Intensive, Hybrid, and Online Courses (Required if applicable)

Misc: Lecture 1 hour/lab 3 hours

Lecture: Via ZOOM

Course Goals

Course Goals

1. Acquire familiarity with a wide variety of manufacturing processes
2. To understand modern engineering experimentation including experiment design, system calibration, data acquisition, analysis and presentation.
3. To develop and apply an understanding of statistical methods to select the best experimental approach to satisfy given requirements of accuracy.
4. To understand how to quantify error and uncertainty in physical measurements.
5. To understand how to apply statistical methods to the analysis and presentation of experimental results.
6. To understand modern data acquisition concepts and requirements.
7. To understand the various categories of mechanical measurements and the sensor technologies that they are based on.
8. To gain hands-on experience with modern instrumentation and systems-level experimentation.
9. To improve written and oral communication skills, to develop the ability to write engineering reports of high quality, and to improve the student's ability to function as a member of an engineering team.

Course Learning Outcomes (CLO)

At the end of the course, the student who has mastered the course material will be able to:

1. Draw a concept map for a generalized measurement system that identifies the most important concepts.
2. Apply basic statistical methods to design experiments, to analyze, and to present the results of experiments. Such methods may include identification of probability distributions of experimental data, estimation of population statistics from large and small samples, classification and propagation of error sources for experiment design and analysis of results, and graphical presentation of statistical descriptions.
3. Identify and describe the elements making up computer-based data acquisition systems, including alternative configurations and technologies.

San José State University
Engineering/Mechanical Engineering
ME120-Experimental Methods – FALL 2021

4. Design a data acquisition system for a given application by analyzing and specifying requirements, selecting appropriate commercial hardware, and writing a computer program to acquire, analyze, and present the desired data.
5. Identify and describe the various types of mechanical measurements including temperature, pressure, sound, motion and position, force and torque, stress and strain, flow visualization and measurement (e.g., volume flow rate, velocity, etc.) and explain the transducer principles that underlie them.
6. Operate modern instrumentation systems that include mechanical and electro-optical technologies and computer-based data acquisition systems.
7. Communicate effectively in written form and in oral presentations information relating to the design and/or results of an engineering experiment.
8. Work productively and effectively in an engineering team.

Required Texts/Readings

Textbook

Experimental Methods for Engineers, custom edition by Pearson Custom Publishing, Boston, MA, 2004 (ISBN 0-536-90018-3).

Other technology requirements / equipment / material

LabVIEW 2016 Student Software License (Contact: National Instruments)

Course Requirements and Assignments

Assignments and Grading Policy

20% for Theory Homework

10% for Mid--Term Exam

10% for Final Exam, scheduled on **Thursday, Dec 9th 0715-0930**

10% for Lab Quizzes

25% for Lab Reports

25% for Term Project

LATE POLICY: Unless otherwise specified for a particular assignment, work that is submitted late will be accepted with reduced credit according to a depreciation factor

Theory Homework Late Policy $d = 0.95 < 24 \text{ hrs}$ $d = 0.70 > 24 \text{ hrs} < 48 \text{ hrs}$ $d = 0.50 > 48 \text{ hrs} < 72 \text{ hrs}$ $d = 0.00 > 72 \text{ hrs}$

Lab Report Late Policy

San José State University
Engineering/Mechanical Engineering
ME120-Experimental Methods – FALL 2021

$d = 0.99 < 1$ week late $d = 0.70 > 1$ week < 2 weeks $d = 0.50 > 2$ weeks < 3 weeks $d = 0.00 > 3$ weeks

The number of hours breached is determined by online submission time stamp or email-received time stamp.

EXCEPTIONS: Any grading appeals or petitions must be communicated promptly in writing (or email). Exceptions will normally be evaluated at the very end of the semester in context with an individual's overall semester track record and all other exceptions class-wide. Special consideration for truly unavoidable and extenuating circumstances will depend on timeliness and supporting documentation (e.g., doctor's note, police report).

“Success in this course is based on the expectation that students will spend, for each unit of credit, a minimum of 45 hours over the length of the course (normally three hours per unit per week) for instruction, preparation/studying, or course related activities, including but not limited to internships, labs, and clinical practica. Other course structures will have equivalent workload expectations as described in the syllabus.”

Final Examination

10% for Final Exam, scheduled on: **Thursday, Dec 9th 0715-0930**

Classroom Protocol

NO TEXTING OR CELL PHONE USAGE DURING THE CLASS

Policies or information required by the Department of Mechanical Engineering
The ME Department does not permit retroactive adding of courses. The ME Department enforces strict sanctions regarding prerequisites. One specific sanction is that any student enrolled in a course without satisfactory completion of the official prerequisites will receive a letter grade of "F".

University Policies

Per [University Policy S16-9](#) ,relevant university policy concerning all courses, such as student responsibilities, academic integrity, accommodations, dropping and adding,
