

Faculty Guide: Embedding Portfolium Entries in Canvas

This how-to guide will walk you through the steps to embed Portfolium entries directly into Canvas. This will allow your students to view Portfolium projects and examples from within the Canvas interface.

Step 1: Create a Page within Canvas

Inside of your Canvas class module, create a new **Page** under **Pages** on the left side of the screen.

On the **Pages** page, click the “+Page” button.

The screenshot displays the Canvas user interface for a course titled 'Practice_Course_Portfolium'. The left sidebar contains navigation icons for Account, Dashboard, Courses, Groups, Calendar, Inbox, Commons, Help, and Library. The 'Pages' option is selected in the sidebar. The main content area shows a table with columns for PAGE TITLE, CREATION DATE, and LAST EDIT. A message states 'No pages created yet. Add one!'. A red box highlights the '+ Page' button in the top right corner, with a white arrow pointing to it.

Enter a title for your page, for example: **MAE101 Capstone Projects**

Then click on **“HTML Editor”**.

The screenshot displays the SJSU eCampus interface. On the left is a blue sidebar with navigation icons for Account, Dashboard, Courses, Groups, Calendar, Inbox (with 45 notifications), Commons, Help, and Library. The main navigation menu includes Home, Announcements, Assignments, Discussions, People, Pages (highlighted), Files, Syllabus, Outcomes, Quizzes, Modules, Conferences, Collaborations, Chat, Attendance, Blackboard Collaborate, Criterion, NBC Learn, LockDown Browser, Writer's Help, +WebEx, and Settings. The main content area shows a page editor with the title "MAE101 Capstone Projects" and an "HTML Editor" button. Below the title is a rich text editor with various formatting options. The right sidebar contains a "Links" section with a list of course content items: Pages, Assignments, Quizzes, Announcements, Discussions, Modules, and Course Navigation. At the bottom, there are options for "Can edit this page role selection" (set to "Only teachers") and a "Notify users that this content has changed" checkbox. Buttons for "Cancel", "Save & Publish", and "Save" are also visible.

Step 2: Copy & Paste Code Snippet

Copy the HTML code below (including the “<” and “>” symbols):

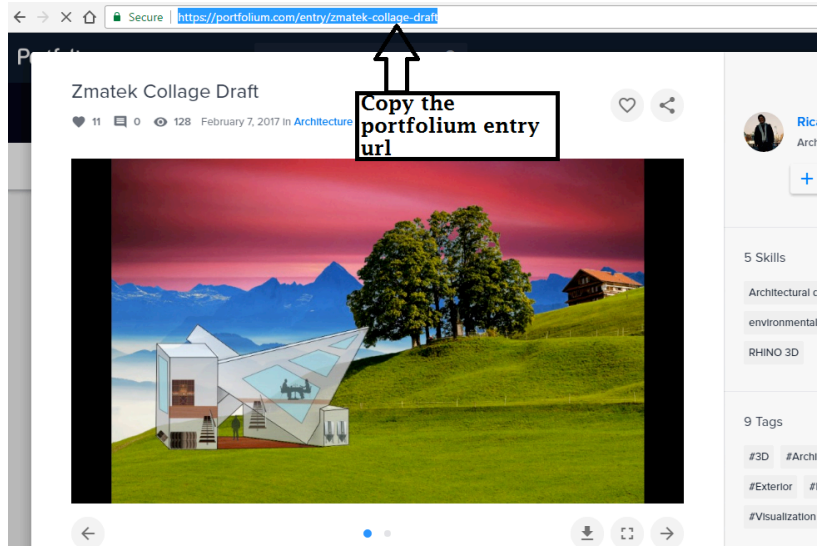

```
<iframe width="350" height="750" async src="[INSERT URL HERE]?utm=canvas"></iframe>
```

Paste this HTML code into the **Large Text Area** window within Canvas's **Create Page** module.

The screenshot shows the Canvas LMS interface for creating a page. The course is 'Practice_Course_Portfolium' and the page is titled 'MAE101 Capstone Projects'. The 'Rich Content Editor' is open, displaying the HTML code snippet: `<iframe width="350" height="750" async src="[INSERT URL HERE]?utm=canvas"></iframe>`. Below the editor, the 'Options' section is visible, with 'Can edit this page role selection' set to 'Only teachers'. There are checkboxes for 'Notify users that this content has changed' and buttons for 'Cancel', 'Save & Publish', and 'Save'. A right-hand sidebar shows navigation options like 'Pages', 'Assignments', 'Quizzes', etc.

Step 3: Copy & Paste Portfolio Entry URL

Copy the portfolio entry URL from Portfolium and paste into the HTML window, replacing where it says “[INSERT URL HERE]” (including the brackets). Then click “Save”.
